Experience

State of California, Office of Data & Innovation

Senior Analytics Engineer, Governor Appointee

01/2024 – Present

- Enable self-service analytics by building, documenting, and testing data models using dbt that are optimized for cost and performance (partitioning, incremental models) and capture business logic and column-level definitions to support data governance – [Example 1](#) | [Example 2](#)
- Develop and lead a [training program](#) equipping 40+ staff with data and analytics engineering skills focused on data modeling, git and version control, local development, dbt, and Snowflake through hands-on business problems, code reviews, and mentorship

Data Strategist, Governor Appointee

06/2021 – 01/2024

- Matured ODI's data operations and analytics capabilities by establishing our data stack (Fivetran, dbt, Snowflake) through tool evaluation and vendor relationship development
- Grew the team from 2 to 5 by collaborating with the Deputy Director of Data Operations and Engineering to shape every role, develop screening questions and assessment criteria, conduct interviews, create documentation, and onboard staff

Founding Data Analyst

06/2020–06/2021

- Partnered with stakeholders to gather requirements, define KPIs/metrics, scope work, and build or recommend the right data product (automated reports, dashboards) to enable decision-making
- Led a cross-functional product fix for ~25K users blocked from scheduling COVID-19 vaccines after identifying an anomaly in scheduling data
- Shaped the public-facing visualizations on covid19.ca.gov/equity by designing [mockups coded in Python](#) that went through multiple rounds of stakeholder review and feedback before ultimately getting approved by Surgeon General, Dr. Nadine Burke Harris
- Drove service improvements to California's unemployment insurance system by proactively analyzing the claimant experience which surfaced systemic bottlenecks and equity gaps and share my recommendations which were cited in [a report \(p. 46\)](#) solicited by Governor Newsom

Vox Media

Data Analyst

08/2016 – 05/2017

- Analyzed Google Analytics and social media data for engagement trends, SEO performance, and other patterns delivering insights that shaped editorial strategy across 5 brands
- Drove 34% pageview increase by building self-service [dashboards](#) via Google Analytics API that enabled stakeholders to compare article performance on demand, reducing bottlenecks from analyst requests and empowering data-informed content decisions

Technical skills

SQL, Python, YAML, Jinja, Bash, VS Code, Claude Code, Snowflake, BigQuery, GCS, AWS, Fivetran, dbt Core, dbt Cloud, dlt, Fivetran, GitHub, Bitbucket, Azure DevOps, Pandas, Jupyter, Jira, Excel

Education

Rutgers Business School, B.S. Marketing

General Assembly, Certificate Data Science
